Forecast for Wednesday 09 Mar 2022

Weather: Dry overnight conditions before a band of rain moves east across the area through the morning, affecting most hills through the afternoon before drier weather spreads east in the afternoon. Rain will soon spread from the west this morning briefly preceded by snow above 1000 metres. Rain clearing this afternoon from the west this afternoon, but freezing levels will quickly lower allowing snow to fall to 600 m as it clears. Severe gale or storm force winds, mainly summits and exposed ridges, giving blizzard conditions through the morning, before quickly easing later.

Chance of cloud-free hill tops above 800m: 70% overnight into Wednesday morning, lowering 30% by midday as rain and snow move in, and 10% early afternoon. Improving from the north and west towards late-afternoon, with 80% chance through the evening.

Low cloud and visibility: Excellent visibility away from isolated hill fog, with patchy cloud with bases 600-800 m overnight, mainly in the south. Visibility lowering moderate in rain through the morning, and very poor in snow or hill fog, with cloud bases widely 300-500 m, and occasionally 200 m. Few and mainly nil significant cloud through the evening with excellent visibility.

Met Office Aberdeen Meteorologist's View

Snow and risk of storm force winds combining to give extremely hazardous conditions through Wednesday.

Forecast for Thursday 10 Mar 2022

Weather: Mainly dry and bright through Thursday with hazy sunshine, but a risk of some hill fog affecting northern hills such as Ben Hope, and the far east during the morning and early afternoon. Lighter winds through the morning, but southerly to southeasterly winds strengthen again through the afternoon, with gales or severe gales summit winds through the evening.

Maximum wind: Southerly to southeasterly winds strengthening through the day, peaking mean 30-40 mph gusting 45-55 mph through Thursday evening, mainly western hills such as Skye and Torridon.

Chance of cloud-free hill tops above 800m: Generally 90% but 40% in the north and east due to low cloud and hill fog.

Low cloud and visibility: Good visibility in the west, but very poor in hill fog to the north and east with cloud bases 150-300 m during the morning and afternoon.

Temperature: **Glens:** Minus 1 celsius increasing to plus 5 celsius.
At 800m: Minus 3 celsius increasing to zero celsius.
Freezing level: All elevations through the morning, increasing 1100 m in east and 500 m in west.
